

SLEEVE FLEX COUPLINGS TYPE RBW

Sleeve-Flex Elastomeric Couplings

Design Features

Need No Lubrication

No Maintenance

Quick & Easy Installation

Clean & quiet Performance

Sleeve-Flex can be installed quickly and easily, because there are no bolts, gaskets, covers or seals. Alignment can be checked with a straight edge placed across the outside of the precision machined flanges. No special tools are needed for installation, alignment or removal.

The teeth of sleeve lock into the teeth of the flanges without clamps or screws, tightening under torque to provide smooth transmission of power. There is no rubbing action of metal against rubber to cause wear. Couplings are not affected by abrasives, dirt or moisture.

This eliminates the need for lubrication or maintenance, provides clean, dependable, quiet performance.
